ASSET ALLOCATION

- 93.2% Stocks
- 3.8% Bonds
- 2.5% Money Market/Stable Value
- 0.5% Other

Percentages are rounded

Asset Allocation shows how the money you've previously invested is allocated among different investment categories based on the total percent of underlying holdings in each asset class. The asset allocations shown are based on information as of the date the statement is generated.

Future Allocation (shown in subsequent modules) shows how any new contributions will be invested.

MORNINGSTAR RISK ANALYSIS

The return risk level is calculated by Morningstar Investment Management LLC and is based on the percent of underlying stocks within your investments. Generally stock investments carry a higher risk, but also have a higher potential return. This is just one way to evaluate a portfolio. Based on an analysis by Morningstar, your return risk level has the highest potential for gains and losses.

ABOUT YOUR RETIREMENT PLAN

We all have preferences. Make sure that your account profile is set up to match yours.

Check your beneficiary choices, your account security settings, and your planning information to ensure your preferences are accounted for.

BENEFICIARY INFORMATION

You have not designated a beneficiary for your retirement account. Protect your loved ones by making sure your beneficiary information is current. It takes just a few minutes to check your choices to be sure your assets will be distributed according to your wishes. Contact T. Rowe Price to designate a beneficiary.

INVESTMENT ACTIVITY

Investment	Beginning Balance	Money In/ Money Out	Gain/Loss	Ending Balance	Future Allocation Pre-tax
Retirement Funds					
T. Rowe Price Ret Blend 2055 B	\$307,062.42	\$18,740.09	\$19,516.36	\$345,318.87	100%
Ending Balance	\$307,062.42	\$18,740.09	\$19,516.36	\$345,318.87	100%

Money In/ Money Out is the net total of all contributions, payments, other credits, withdrawals, other debits, and transfers made to and from your investment(s). Future Allocation percentages show how new money will be allocated to your account as of July 12, 2023.

RETIREMENT PLAN FEES AND EXPENSES

Plan Administrative Expenses *	-\$16.99	This section shows a detailed breakdown of fees deducted directly from your account during the period and may not include all investment-related fees and expenses.
Total Fees and Expenses	-\$16.99	

*Plan Administrative Expenses include your share of plan-wide expenses that accrued during this period and include day-to-day costs (for example, legal, accounting, trustee and recordkeeping costs and compliance and communication service fees) associated with administering the plan.

Some of the plan's administrative expenses for the preceding quarter were paid directly from the total annual operating expenses of one or more of the investment options offered under your plan (for example, through revenue sharing arrangements, Rule 12b-1 fees, sub-transfer agent fees). These expenses are in addition to any plan administrative expenses (i.e., plan-wide fees and expenses for general plan administrative services, such as legal, accounting, recordkeeping) that may have been charged to your account during the period and identified as "Plan Administrative Expenses" in this statement.

T. Rowe Price Retirement Plan Services, Inc. ("TRP") provides fee credits to your plan in recognition of revenue sharing, Rule 12b-1 and sub-transfer agent fees it earns for services to the investment options. Your plan sponsor has elected to have these credits allocated to accounts in participants meeting the plan's allocation criteria. If you receive an allocation, the fee credit is reflected with your other credits in the Account at a Glance and Transaction Detail sections of your statement. The amount allocated to your account is determined using your balance in plan investment options for which TRP earns service fees and the credit rates available on <https://rps.troweprice.com> in the Legal Documents section under Investment Crediting Rates. Fee credits are generally allocated after the end of the quarter during which the fee credits were earned.

Diversification

To help achieve long-term retirement security, you should give careful consideration to the benefits of a well-balanced and diversified investment portfolio. Spreading your assets among different types of investments can help you achieve a favorable rate of return, while minimizing your overall risk of losing money. This is because market or other economic conditions that cause one category of assets, or one particular security, to perform very well often cause another asset category, or another particular security, to perform poorly. If you invest more than 20% of your retirement savings in any one company or industry, your savings may not be properly diversified. Although diversification is not a guarantee against loss, it is an effective strategy to help you manage investment risk. In deciding how to invest your retirement savings, you should take into account all of your assets, including any retirement savings outside of the Plan. No single approach is right for everyone because, among other factors, individuals have different financial goals, different time horizons for meeting their goals, and different tolerances for risk. It is also important to periodically review your investment portfolio, your investment objectives, and the investment options under the Plan to help ensure that your retirement savings will meet your retirement goals. For more information on individual investing and diversification, visit the Department of Labor website: <http://www.dol.gov/ebsa/investing.html>.

Vesting

Your vested account balance may contain multiple contribution sources with different vesting schedules. Vested balance refers to the amount of your account balance that you are entitled to receive when you terminate employment. You are always 100% vested in the portion of your account from any contributions you make (for example: contributions out of your paycheck or rollovers from previous plans), plus or minus any associated earnings or losses. You become vested in all company matching or other employer contributions and any associated earnings or losses based on years of service. Please refer to your summary plan description for more information about your vesting schedule and details on how to calculate your vested balance.

*Your Account Return represents an estimate of your portfolio return based on available account data using a time-weighted daily value calculation. The return reflects the results of your investment selections as well as account activity since your account was established at T. Rowe Price. Please note the calculation will include any returns starting with the first financial transaction, however, the start date listed for Your Account Return will show as month-end following that transaction (or 1/31/2000, whichever is later). All returns over one year are annualized. Other return formulas may yield different results. Past performance is no guarantee of future results.

Limitations or Restrictions on Right to Direct Investments

Your right to direct certain investments may be limited based on plan rules. Please reference your summary plan description or the 404a-5 participant disclosure for more information.

When you are applying particular asset allocations to your individual situation or assessing the adequacy of an estimated retirement income stream, consider your other assets, income and investments (e.g., equity in your home, IRA investments, savings accounts, and interests in any other employer plans) in addition to your interest in this plan.

Diversification cannot assure a profit or protect against loss in a declining market.

All investments involve risk, including possible loss of principal.

Please review your statement and report any errors to T. Rowe Price within 60 days.
